SUMMARY

Highly effective at developing and standardizing designs according to company brand and objectives. Ready to bring 3+ years of experience leveraging JavaScript to build responsive websites, mobile apps, and interactive features that drive business growth and improve UX. Experienced in writing scalable and well-documented code, and helping companies to create and maintain a better and reusable code base by best practices, and clean code.

TECHNICAL EXPERIENCE

independent projects
- Implemented Azad fekri social media PWA (twitter like app about future of Iran's politics and freedom)
- participate in a VOD - VR project, showing live event with the capability of 3d view and camera selecting. mobile version used Gyroscope and desktop version used mouse motion to detect the motion and change the 360 view using Videojs .
- NPM Package: persian-use: persian-use is a scalable utility package designed for JavaScript developers to handle Persian language functionalities. The source code follows clean architecture principles and includes comprehensive testing with Jest. It has a complete CI/CD pipeline integrated with GitHub Actions. The project incorporates eslint, prettier, and husky for clean code, ensuring consistency and quality. persian-use is an essential tool for developers working with Persian language in JavaScript.

Front-End Developer   **April 2022 - Present**
Pixaldo (Remote)   *Germany*
One of the major German companies in the field of warehousing and logistics organizes the warehouse as well as the dispatch.
implement user-friendly, world-class react mobile application(PWA) for medium-sized warehouse management for business owners.
- Participate in code review, and interview process, responsible for onboarding new teammates.
- Develop various wizard flows for complex data collection and validation and architecture of submitted data using Redux (e.g. develop wizards for multiple warehouses with more than 10,000 items and 100 corridors)

Front-End Developer   **January 2022 - October 2022**
Freelance (Remote)   *United States*
Server and uptime monitoring web application startup located in silicon valley.
- Migrated UI from the old Angular version to React and keep its page size below 300kB.
- Implemented for supporting real-time monitoring of 30+ servers per page using Web Socket (Socket.IO).
- Implemented a JavaScript Linux CLI comamand builder based on user input and back-end data.
- Managed tight deadlines in an agile environment, Cross-cultural teamwork, and negotiation of UX enhancements.

WordPress Developer (theme and UI)   **June 2020 - June 2022**
Calistu (Hybrid)   *United Arab Emirates*
Digital marketing startup based in Dubai participated in a major wide range of business IT collaborations.
- Developed More than 40 WordPress websites and 3 headless projects for 5 countries and 3+ languages.

SKILLS

Programming languages	JavaScript, ES5/ES6/TypeScript
Libraries and packages	React Query ,RTK query ,SWR ,PWA React Redux , React Router , Formik , immer , eslint prettier husky , i18n , Frontity , Zustand, JSDoc , styled-component , NEXTjs , jest, Cypress, NodeJS, Express, Vite, webpack
CSS related skills	Bootstrap, SASS, SCSS, Tailwind, Material UI, Ant design
Other	TDD, Clean code, Git, NPM, Agile Scrum, WordPress, Project Architecture, Figma, Adobe XD
Interpersonal skills	Communication, Teamwork, Critical Thinking

EDUCATION

Bachelor of Software Engineering   January 2019 - October 2021
University of Applied Science   Iran-Tehran
Associate of Mechanical Technology   January 2015 - July 2017
Razi University   Iran-Kermanshah

INTRESTS

Blues rock guitar player - Winner of the Iranian electric guitar soloist contest.
Good proficiency on over 5+ board games.
